REASONS FOR ALLOWANCE

➤ The following is an examiner's statement of reasons for allowance: The present invention is directed towards an image process apparatus. The closest prior art, Wang (USPN 6,157,738), shows a similar system, in which, a method for identifying and extracting text data from a table-cell frame, the method includes the steps of tracing connected components of a document image, tracing white contours within a connected component, defining a frame outline based on the white contours, identifying unattached character data inside the frame outline, and defining an initial character area inside the frame outline. However, Wang fails to address: "for wherein an image process section corrects a portion when a separation result is substantially coincident with the area data and the attribute data, wherein the image processing unit performs character recognition with respect to the separated text when the separation result is completely coincident with the area data and the attribute data and wherein the image process unit returns to an initial state when the separation result is not coincident with the area data and the attribute data". These distinct features have been added to the sole independent claim and renders it allowable.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
